Lenovo ThinkSmart Core + Controller

Power your dynamic, scalable, and sophisticated high-impact spaces.

Improve employee engagement with technology that seamlessly integrates with collaboration platforms, dynamic audio components, and excellent video. Lenovo ThinkSmart Core + Controller, powered by the Intel vPro® platform with Intel® Core™ i5 processor, outperforms basic technologies wherever collaboration happens. Get rid of frustrating meeting spaces and create professional-grade AV experiences that are accessible for anyone.

FLEXIBLE

With the Lenovo ThinkSmart Core + Controller as the foundation of your high-impact spaces, technology makes digital meetings feel like face-to-face experiences. Certified for Microsoft Teams Rooms, this scalable solution works with other certified devices to amplify your technology investments. With multiple device ports and a top-of-the-line processor, each boardroom, executive space, training room, and auditorium can be designed according to its purpose, not its size.

PURPOSE-BUILT

Every detail of the Lenovo ThinkSmart Core + Controller is engineered with intention to help eliminate disruptions and technology failures. Thoughtful features include a hinged backdoor that locks down wires and a minimized external reset button—both designed to prevent users from accidentally disconnecting during meetings. Even setup and installation are easy with a built-in VESA mount and Wi-Fi antenna. And with a quiet fanless enclosure and wider operational temperatures, you can choose between housing the ThinkSmart Core in the meeting space or hidden in a server room or closet.

POWERFUL

Engineered for maximum reliability and 24/7/365 operation, this powerhouse delivers the high-performance you need for consistent collaboration and easy management. The Intel vPro® platform with Intel® Core™ i5 processor delivers responsive performance, reliable connectivity, and comprehensive hardware-based security, all while maintaining energy efficiency.

Take control of your meeting.

Choose from two intuitive 10.1-inch, 10-point touch displays to initiate, share content, and easily manage every meeting.

LENOVO IP CONTROLLER

The Lenovo IP Controller addresses the growing demand for on-table HDMI and PoE connectivity with no lag. Plus, because it's wall mountable and can be installed up to 100 meters from the ThinkSmart Core, the Lenovo IP Controller creates a clean aesthetic ideal for the modern workplace.

LENOVO THINKSMART CONTROLLER

The Lenovo ThinkSmart Controller delivers simple, intuitive meeting control at your fingertips. And with the anti-glare and anti-fingerprint display, there will be no more smudges clouding the view.

Build your meeting room solution on a solid foundation.
