

**M Solutions**

## Go greater lengths with Lenovo and MSolutions

Together, Lenovo and MSolutions, create a simple and elegant solution that solves the common problem of cables from the conference room table to the display wall not being long enough. The MSolutions MS-6U1C is an entry level USB-C extender that pairs with Lenovo's ThinkSmart USB portfolio allowing for a single USB-C data channel to be extended to distances of up to 100m over a single CATx cable infrastructure.
