

IDEAL FOR UNEVEN SURFACES

BT8380-AFB

BOLT DOWN FLOOR BASE WITH LEVEL ADJUSTMENT

Designed to securely fix B-Tech's vertical columns, poles or rails to uneven floors, the BT8380-AFB uses a levelling plate with +/-13.5mm of adjustment available on each corner ensuring a level installation of the display stand. The bolt down floor base is suitable for use on floors with minor slopes or uneven surfaces and strong enough to support substantial loads of up to 150kg per column. With a minimal footprint, the BT8380-AFB is ideal for installations where floor space is limited, such as corporate locations, control rooms, retail shop fronts or for close to the wall displays.

SPECIFICATION

Max load	150kg per base*
Base dimensions	W: 183mm D: 213mm H: 45mm
Adjustment	+/- 13.5mm in each corner
Bases supplied per pack	1
Colour	Black

**No more than 100kg should be mounted at a height above 1.2m on BT8380 columns*

FEATURES

- Level adjustment suitable for use on uneven floors
- Small footprint is ideal for retail and corporate applications where floor space is limited
- Heavy duty steel capable of supporting substantial loads
- Can be used for large scale DVLED or videowall installations in straight or curved configurations - ideal for applications such as control rooms
- Integrated cable management
- Compatible with a variety of B-Tech columns (BT8380 / BT8381 / BT8385), poles (BT4116 / BT4118) and rails (BT8390)
- TUV certified

SYSTEM X™

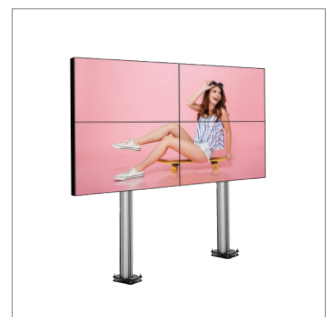

Level adjustment screws for adjusting the base on an uneven surface

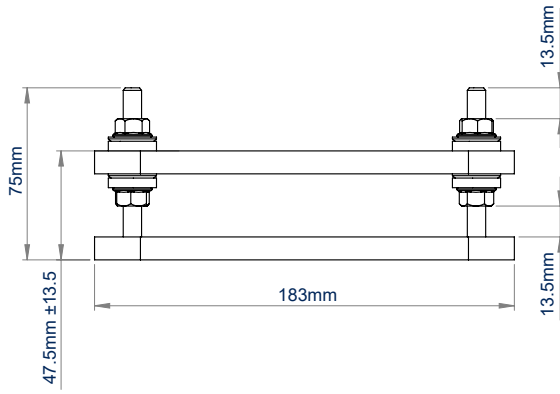

Can be used for single column installations in landscape or portrait format
