

# Arc Meeting Table

# Inclusive Hybrid Collaboration Made Easy

The Salamander Designs Arc Table is designed for optimum collaboration and interaction during hybrid meetings and conferencing, presenting a clear view for everyone involved. The innovative, curved semi-circle shape sets the stage for the most natural, inclusive site-to-site viewing experiences where every participant can be seen, heard and fully engage.

# A Modular Table Made to Fit You and Your Space

The Arc is a highly unique modular conference table system that's easy to configure to fit any size team and room – small to large.

# Connect, Charge + Advance

Arc Tables can be personalized with your choice of wire management ports and seamless, easy-connect flip-top ports. Enjoy a complete, functional video conference and meeting table that's always ready when you are.

## Wire Management

A large capacity, enclosed wire-look cable management housing is included. It extends unobtrusively up the table leg from the floor to an under-table raceway and accommodates all cabling and small power strips.

# Customize Your Arc Meeting Table.

Each table segment accommodates two people, with typical configurations being made to support 4 to 10 users. As with all Salamander enterprise furniture, additional custom options are available to meet exact business needs. And the modular system can be expanded or reconfigured any time, allowing for the most efficient use of space.
