

Instant analysis and resolution of mains power issues

The enVision power conditioning system’s analytical software monitors, identifies, analyzes, and offers solutions to resolve mains issues that can cause equipment error codes, malfunctions and downtime.

The enVision provides visibility and control into the mains conditions at a customer’s site by gathering and analyzing data to facilitate root cause discussions with affected customers. It interprets the data into key metrics and trends, and baselines the factors that influences equipment operation, damage conditions, and inefficiencies. It is the only software that identifies the potential cause of power issues, and offers solutions to resolve them.

It also includes Multi-Stage power protection and conditioning that includes Cat 6 network and earth fault protection to make sure connected equipment is safeguarded when electrical disturbances occur.

The enVision allows service teams to make informed, fast business decisions to increase profitability and customer satisfaction.

Features:

- ▶ Measures line and neutral to ground voltage, crest factor, power factor, and line frequency metrics
- ▶ 512 time stamped events with specific date and time
- ▶ Historical max./min./avg. data up to 138 days
- ▶ Customizable settings
- ▶ Multi-Stage mains power protection and conditioning
- ▶ Catastrophic over/under voltage shutdown
- ▶ Inrush current elimination
- ▶ Internal battery
- ▶ Remote access with optional Remote Portal module

Model	Plug Config.	Outlet Config.
EV-23010	240V/10A	C13  x2
EV-23016	240V/16A	C19  x1
EV-23030-GNS	240V/30A	IEC-60309 33206  x1
